ABOUT BEING BLOCKED ON LINKEDIN → On November 3rd, 2024 I decided to make a test and start over a brand new Linkedin account. My 1st account was under a "temporarily restricted access" which means I was banned from Linkedin, which happened in August 2023. So after a whole year has passed, I noticed that this is something Linkedin was doing to hordes of people on PURPOSE, leaving many business people out of the possibility to connect with others in THE MARKET. If too many people are being banned from Linkedin, a Social Network for business connections, then it means a lot of The Market is gonna break, because we need business connections to do business in practice. Without it, The Market shifts to something else. Something ugly. It's a truth we need to face. So the point of this card is to document it because The Market is too concentrated in a few Social Networks creating a problem for true Capitalism. Now, about the new Linkedin account: THE NEW ACCOUNT WAS TOO BANNED ON THE VERY SAME DAY I OPENED IT!. THAT was a shock! It also means I'm being targeted thanks to my publications against BIG TECH (Linkedin is now owned by Microsoft, remember?). It's good that I'm dealing with this in the level I'm currently at, because it pushes me to find new solutions. I was mistaken to assume that since Linkedin is not originally a Microsoft product, it would mean that the Social Network was free from Microsoft's fingers. Looks like I was wrong. BIG TECHS are expanding their political reach. So I'm glad I'm able to document it. What else in The Market is under BIG TECH influence?
