I CANNOT READ THIS ABOUT GOOGLE EARTH AND STAY QUIET AFTER KNOWING THE TRUTH → Seriously, look at this: “Google unveiled advanced artificial intelligence capabilities for Google Earth on Wednesday, integrating its Gemini AI technology with decades of satellite and weather data to forecast climate disasters and identify vulnerable communities before they strike. Users can now ask natural language questions like ‘locate algae blooms’ to monitor drinking water sources, or request analysis of flood-prone areas and vulnerable populations. The system processes these queries by automatically connecting weather forecasting, satellite imagery, and demographic models to provide comprehensive responses within minutes” – [SOURCE: Perplexity A.I. - Google Earth adds AI to predict climate disasters](#). How much of it is [Terra Vision? Google STOLE a billion dollar software \(!\)](#). The real business world is cruel. Major thieves setting up market standards.
