MARKET FACT #101

80%

is the self-sufficiency rate of energy supply of China, making it less reliant on other nations for power supply.

DATE: November 20, 2023

COMMENT: The next level of China self-sufficiency plan is to increase its level to 84% of self-sufficiency in energy supply. **China's Energy Sources are currently divided by Coal (55%), Oil (19%) and Natural Gas (8-9%) making China currently dependent on fossil fuels.** However, China still relies on IMPORTED Oil and Natural Gas for its consumption. Over 60% China's Oil Consumption comes from OTHER countries. China has built a multi-billion dollar oil and gas pipeline to address this energy security problem.

A MESSAGE FOR BRANDS

BUSINESSES ONLY: Are you reading too many cards or articles? Then [you probably need Professional Consulting Projects.](#) That will boost your Marketing/Business results in a short amount of time. [Prices start at €399 per hour.](#) Buy a Project. Save time. Grow your business now. The market does not wait.
