ROBOTS were being produced by other robots in just 24 hours by Fanuc, a Japanese company in 2001

DATE: November 25, 2023

COMMENT: If you think “robots are not here yet” then think again. The only reason we aren’t seeing robots walking down the street, or filling the shelves of supermarkets at mass scale is only because of two things: **market opportunity and regulation**. Some markets are more advanced like Japan. Others are preventing A.I. and Robotics from spreading fast, which is the case in the U.S.. However nothing is stopping Robotics. [Elon Musk said that robots may surpass the 1-to-1 ratio to humans, meaning the “population of robots” will surpass the amount of humans alive.](#) And he’s not wrong.
