MARKET FACT #116

50%

of the nuclear power market is controlled by RUSSIA. And it's building new reactors in China, Bangladesh, India, Iran, Egypt, Turkey, Hungary and Slovakia

DATE: November 27, 2023

COMMENT: Now knowing that previous published hard fact that **25% of the European Union's electricity comes from NUCLEAR power**, how much of the world's nuclear energy is under the hands of Russia? Because this nuclear energy can surely be weaponized. And Russia is "invading" other countries. Relations between countries can change everything overnight.
