MARKET FACT #118

11th

Data Center is the one being opened by Facebook in 2023. In 2021, Facebook was investing 2 BILLION dollars in 1 Data Center.

DATE: November 27, 2023

COMMENT: Facebook, one of the WORST criminal BIG TECH companies (for those who know its history, dating back to Snowden) is stretching its claws and building up Data Centers, to ensure the availability of its monopoly. This stat alone shows how much money is into a single data center and how many Facebook needs to stay operational. While at the same time, it’s enjoying tax breaks in cities like Prineville up until 2027.
