MARKET FACT #131

$52

billion in CHINESE LOANS were forced to renegotiate between 2021 and 2022 by Chinese policy banks because loans were not being paid back nor turning a profit.

DATE: November 30, 2023

COMMENT: China made many loans with countries from Latin America and The Caribbean in the 2 recent decades and most of them (almost 50%) were NOT being paid back (!). That means that the money “wasted” is going to turn into different kinds of payments: natural resources like LAND for instance. So if that many loans are not paid by a certain DATE, expect “foreign land” to be taken.
