**existing jobs in CHINA could be cut
in the next 20 years.**

DATE: December 5, 2023

COMMENT: The chinese people may be the 2nd largest potency in A.I. development in the world but at the same time, the bill will come to their own people as well. Chinese people will face job loss and mass unemployment just as much as their western counterparts. And because of its latest fast advancements in the race for mastering true A.I., we may see the chinese data appear as evidence even before the US (data on mass unemployment). As the source says ([CNA INSIDER](#)), [Goldman Sachs predicts A.I. will replace 300 MILLION jobs worldwide \(!\)](#). **This means people are now looking for jobs they'll eventually lose in the near future. Furthermore, people are studying to get jobs that won't matter.** Both scenarios will cause sudden disruption in The Market.
