MARKET FACT #142

50%

of the electric power in Denmark is done by Wind Power, making the country the highest per capita in The World for wind usage as a means for electricity.

DATE: December 7, 2023

COMMENT: Additionally, up to 18,000 households can be supplied with ONE wind turbine that generates energy in Germany. This is a lot of clean energy being produced by wind power plants alone, and with the example of Denmark, it shows that it works. No country has half of its energy supply coming from Wind Power like Denmark.

A MESSAGE FOR BRANDS

BUSINESSES ONLY: Are you reading too many cards or articles? Then [you probably need Professional Consulting Projects.](#) That will boost your Marketing/Business results in a short amount of time. [Prices start at €399 per hour.](#) Buy a Project. Save time. Grow your business now. The market does not wait.
