MARKET FACT #159

\$100

**MILLION is the amount of money
required to train Open AI's GPT-4.**

DATE: December 23, 2023

COMMENT: For those who think that getting into the A.I. business is easy, think again. There's still one barrier: MONEY. Hence why The Wealth Gap is gonna be bigger in the next few years because only a selected few are currently being able to create TRUE A.I. systems that can generate impact on The Market and cut costs and boost productivity all at the same time. You need tons of Data to do that. And you need to comply with new laws that are slowing down A.I. advancements. And you need to pay copyrighted work in order to use it in your A.I. systems as training data. That costs money. But is also true that once you have that money, the growth of the company can be exponential while at the same time, you won't need too much human labor. Some say that A.I. companies in the near future will have only 3 employees. Three.

A MESSAGE FOR BRANDS

BUSINESSES ONLY: Are you reading too many cards or articles? Then [you probably need Professional Consulting Projects.](#) That will boost your Marketing/Business results in a short amount of time.
