MARKET FACT #163

40K

objects in space are monitored autonomously by an operational prototype A.I. named Machina used by Space Force nowadays.

DATE: December 31, 2023

COMMENT: If you don't believe A.I. is here to stay you're delusional. Machina, used by U.S. Space Force, is currently orchestrating thousands of data collections nightly with a global telescope network. As Quartz reveals, [Machina's algorithms marshal telescope sensors. Computer vision and large language models tell them what objects to track \(!\)](#). Impressive A.I. put at work, that's for sure. And that's not all. Another AI project at Space Force analyzes radar data to detect imminent adversary missile launches, again....autonomously.

A MESSAGE FOR BRANDS

BUSINESSES ONLY: Are you reading too many cards or articles? Then [you probably need Professional Consulting Projects.](#) That will boost your Marketing/Business results in a short amount of time. [Prices start at €399 per hour.](#) Buy a Project. Save time. Grow your business now. The market does not wait.
