MARKET FACT #178

12x

faster calculations were made by a machine-learning model (A.I.) responsible for predicting how much electricity will be needed the next day on a SMART GRID.

DATE: January 3, 2024

COMMENT: A.I. is now assisting in power grids turning them into SMART Grids. The fame of power grid systems being the complex machines ever built makes such a breakthrough with A.I. another milestone. This A.I. reduced the time of calculation of energy management from 10 minutes to 60 seconds. It can also forecast power outages by looking at weather, geography and income levels.

A MESSAGE FOR BRANDS

BUSINESSES ONLY: Are you reading too many cards or articles? Then [you probably need Professional Consulting Projects.](#) That will boost your Marketing/Business results in a short amount of time. [Prices start at €399 per hour.](#) Buy a Project. Save time. Grow your business now. The market does not wait.
