MARKET FACT #190

90%

**of North Korea's exportations go to
just one country: CHINA.**

DATE: January 9, 2024

COMMENT: North Korea's biggest trading partner is China. This shouldn't surprise you, since communist nations always try to be friends with each other. Because of its business relationships, thousands of north koreans are served as labour forces to chinese factories. And the most absurd part is that north koreans are even CHEAPER labour than chinese labour. However, at the same time, the future of factories is more Robots, with [a chinese factory in Dongguan City becoming famous for recently replacing 90% of its human workforce with machines](#), which means that eventually these north koreans (and the chinese) will be OUT OF WORK. And that's for sure, because [productivity increased by 250% while at the same time it saw a 80% drop in defects](#). Both of these people need one thing: to be freed.
