**employees of Walmart were fired in
the course of 2023.**

DATE: January 18, 2024

COMMENT: This may seem old to some but the business world is under The Internet haystack now and certain things slip away. Despite [reporting incredible amounts of massive layoffs done recently by big enterprises, banks, famous companies](#) and the like, it seems that it's still not enough. There's more layoffs because Walmart is also cleaning house. And Walmart has absurd levels of success: [120M shoppers purchase on one of the 4,200 Walmart stores or shop on its websites EVERY MONTH + 90% of Americans live within 10 miles of a Walmart store](#). Nice. Great number of true customers + great location strategy. Nonetheless, the goal is more: "Within three years, [by the end of its fiscal year 2026, Walmart said it expects about 65% of its stores will have automation capabilities](#)". Yes, A.I. is coming. To stay.
