MARKET FACT #219

12M

Americans will need to SWITCH jobs by 2030. Why? Because A.I. will take over their jobs.

DATE: January 21, 2024

COMMENT: I think this is actually a small number considering that Technology is part of our everyday lives since at least the 2000s. The Market has swallowed tech. It's now part of most businesses' infrastructure and everyday operations, forcing them all to go to war for efficiency (not to mention the WAR for ATTENTION). But one "old" study (2013) from Carl Benedikt Frey and Michael Osborne seems a bit more accurate, stating that 47% of US jobs are at risk of being automated amid the AI boom by the mid-2030s. Furthermore, if 25% of CEOs are considering replacing human workers with A.I., 12M Americans is a small number (although that last data point is Davos – global). It may be more.
