MARKET FACT #22

43%

**of all websites on the Internet are
powered by the Wordpress Content
Management System (CMS)**

DATE: September 1, 2023

COMMENT: Because of the enormous popularity of Wordpress, businesspeople need to remind themselves that when something goes “viral” in the Business World, hackers (actually crackers) follow up and try to destroy and hack into any system that is using this new market standard. Like the article says, there is a huge number of third-party plugins designed for extending the functionality of this popular platform. New vulnerabilities exploited by hackers are discovered both in plugins and in WordPress itself on a regular basis. From May 15 through July 31, 2023, it was discovered **22.400 unique WordPress websites** that had been hacked to create phishing pages. Success has a price. Remember that.
