MARKET FACT #221

\$42K

**is the price of a single BITCOIN
fetched as of December 30, 2023.**

DATE: January 24, 2024

COMMENT: Although I don't monitor cryptocurrencies as much as the other business subjects, it's pretty impressive to see a single bitcoin go over 40,000 dollars. It's a **154% price increase in 2023. HALF is the share of crypto assets that bitcoin accounts for, up from 38% at the end of 2022.**

Outstanding. Not many business owners nor entrepreneurs are placing their eyes and attention on crypto as they should. IF there's a way to financial independence where governments can't touch you, we should focus on that.

Believe me, governments have been trying to block crypto and its growth. Here's [how the U.S.A and the world regulate bitcoin and other cryptocurrencies](#).

Furthermore, [paying taxes on it is really a nightmare](#). We need more solid crypto solutions, that's for sure. Don't you think?

A MESSAGE FOR BRANDS
