MARKET FACT #229

50%

**of Facebook Monthly Active Users
(MAUs) were already FAKE in 2019.**

DATE: January 25, 2024

COMMENT: For those who are still naive to be using Facebook, the criminal BIG TECH company, whether that's for business or personal use, know now that half of its MAUs are actually fake. Something I had to bring back to life after seeing so many people still talking about putting their businesses on the website / company. Here's some hard truth: "The fact of the matter is that Facebook does not know and will not ever have an accurate way to measure its fake account problem," claims the report. "Taking all of these factors into account, we estimate that 50 percent or more of Facebook's current MAUs are actually fake." –

SOURCE: [Mashable](#). It's an "old" article but the subject remains alive. One more hard truth: [The Media industry had a 48% drop in Facebook traffic](#). Low traffic. Fake people. What more evidence do you need to leave this place?
