MARKET FACT #290

2x

**more WASTE INCINERATION is
what the European Union (EU) has
done from 1995 to 2019.**

DATE: August 16, 2024

COMMENT: European countries have a special relation with trash. Countries like Denmark and Sweden have overbuilt or overused waste incinerators. For instance, Sweden, has to import 800,000 tones of trash to burn for energy because they overbuilt. Too many waste incinerators, not that much trash. In certain countries like Thailand it's the reverse, with the country complaining about having to handle too much trash from countries like the U.S.
