MARKET FACT #306

40%

**of ALL GLOBAL Military spending is
done only by the United States.**

DATE: August 28, 2024

COMMENT: Since The United States of America became a world superpower after WWII ended, the country has not saved money when it comes to military investments. There's this need of becoming the most feared nation to mess with if we are saying how things are in practice. Additionally, that has a COST. Here's a very important note: 800 United States Military Bases exist abroad, in +70 countries as of 2020. While China, has only ONE. How much money that costs americans? Think about that. Furthermore, is the country holding back strategic info / intel from its own citizens to have that level of military spending in comparison to all countries without warning them of a possible WWII?
