MARKET FACT #313

28%

of China's population currently agree with the statement: "In our country, effort is always rewarded". A drop from 62% in recent years.

DATE: August 30, 2024

COMMENT: Whether do you agree with the statement or not, it's obvious that this is not the case anymore. A 28% is still a pretty high number. World Markets are attacking Capitalism for more than a decade by now, and that includes the United States. In China is no different. Actually, to be brutally honest, most of the GROWTH China experienced is thanks to theft of Intellectual Property from Germany and The USA [[remember?!](#)]. Then the people are put to work. Inequality in China happens because people don't have means or connections
