MARKET FACT #321

200x

more abundant in the atmosphere is CARBON DIOXIDE in comparison to Methane gas. However, 30% of the warming experience until now was done by Methane.

DATE: September 5, 2024

COMMENT: There's not much intel on climate change yet (I like putting out intel-heavy information), but this is a card worth sharing. More on this: **"What's most different about methane is that the gas is very short-lived, having a lifetime of somewhere around a decade in the atmosphere before it breaks down"**—

SOURCE: [MIT Technology Review Newsletter, September 4, 2024](#). Nice.

A MESSAGE FOR BRANDS

BUSINESSES ONLY: Are you reading too many cards or articles? Then [you probably need Professional Consulting Projects](#). That will boost your Marketing/Business results in a short amount of time. [Prices start at €399 per hour](#). Buy a Project. Save time. Grow your business now. The market does not wait.
