MARKET FACT #333

5%

of A COUNTRY'S LAND must be given to solar panels in order for a country to decabornise by 2050.

DATE: September 9, 2024

COMMENT: There's more from the source you should know: "Floating solar arrays, deployed on man-made reservoirs or lakes that aren't used for recreation, could help alleviate the problem. Especially for land-scarce countries, it simply makes sense. It's the same logic that pushed wind farms offshore. The bulk of growth in floating solar has been in the population-dense regions of East Asia. The world's biggest plant, the Dezhou Dingzhuang solar array in China, has a peak output of 320MW. Meanwhile, South Korea is currently building a floatovoltaics park that will eclipse all others with a capacity of 2GW — enough to power around 1 million homes." — [SOURCE: The Next Web.](#)

A MESSAGE FOR BRANDS

BUSINESSES ONLY: Are you reading too many cards or articles? Then [you probably need Professional Consulting Projects](#). That will boost your Marketing/Business results in a short amount of time. [Prices start at €399 per hour](#). Buy a Project. Save time. Grow your business now. The market does not wait.
