MARKET FACT #345

21%

**is the amount of DECLINE in
freelance jobs involving writing and
coding because of A.I. (ChatGPT).**

DATE: September 11, 2024

COMMENT: This is for those who remember those dumb words by “experts” who said that there would be no job destruction nor massive layoffs due to A.I.. It’s annoying to keep bringing the truth so people can fight back in time. Speaking the truth is a must in the game of business (especially nowadays), and many are hiding behind false pretenses to protect careers and C-level roles or brand value. But the reality is that massive amounts of money are being spent on A.I. using high-quality data which WILL bring to World Markets high-class A.I. that destroys both companies and jobs altogether. It’s not coming. It’s here.
