MARKET FACT #396

1.4x

is how much white-collar workers in China earn more in comparison to blue-collar jobs (2023). A strong rise from 2.4x in 2012.

DATE: November 17, 2024

COMMENT: The population in China are having good progress in terms of Wealth Gap considering recent numbers that came out. Now, blue-collar workers are earning just 1.4x less than white-collar ones. This means that the chinese economy is starting to reward working people. On a side note, remember that massive layoffs are restructuring everything (remember: [Market Fact #244: Massive Layoffs?](#)) Nonetheless, go Chinese people!
