MARKET FACT #427

4.7M

gallons of WATER are necessary to run daily a TSMC chip factory in Arizona (USA).

DATE: December 20, 2024

COMMENT: However, by recycling some of that water (around 65% of it), the factory can use “just” 1 MILLION gallons of water instead. Other interesting facts: “There’s the need of 2.85 gigawatt-hour PER DAY for the 1st TSMC factory in the USA to function normally, which is equivalent to enough energy to power 100K U.S. homes” – [SOURCE: CNBC](#). Energy and Water are major requirements for running a chip factory. [The world is already in a water crisis \(remember?\)](#), so we hope that all this effort will bring economic progress.

A MESSAGE FOR BRANDS

BUSINESSES ONLY: Are you reading too many cards or articles? Then [you probably need Professional Consulting Projects](#). That will boost your Marketing/Business results in a short amount of time. [Prices start at €399 per hour](#). Buy a Project. Save time. Grow your business now. The market does not wait.
