MARKET FACT #55

800K

federal employees in the U.S. were furloughed or worked without pay during the last 34-day government shutdown that ended in January of 2019

DATE: September 26, 2023

COMMENT: A U.S. Government shutdown now in 2023 can help crash markets faster, since the market is too centralized on Monopolies (especially Big Techs) and major pro-business laws can make Capitalism “reborn again”. The stoppage of federal workers along with strikes along with a monopolized market can only result in one thing: **An anomaly never seen before as a Financial Crisis.**
