MARKET FACT #75

1 in 4

**workers reported symptoms of
BURNOUT in a research of 2022.**

DATE: October 23, 2023

COMMENT: Why is that important? **Because this shows that the economy we all rely on is being DRAGGED by (with a lot of effort) employees who are already in burnout. Which means that many employed people simply cannot produce anymore for a period of time (a period of recovery).** Things like The Duopoly (Google & Facebook) + anti-business laws + market consolidation + low pay + A.I.-productivity levels are all contributing for an international workforce that is tired of doing hard work for little returns. And that means companies stop producing normally. So if companies keep ignoring the true needs of its workers, we are all heading towards a market shutdown, where everybody is overworked and not enough production sees the light of day.
