COMMENT: The year of 2025 needs to be closely monitored if you want to take advantage of opportunities in today's Global Market. The following are interesting data points which can give you some core insights. Time to read: [2025 is the year where Waymo surpassed 10 million total paid rides, with weekly rides jumping from 10,000 in August 2023 to over 250,000 now](#). The self-driving taxi is owned by GOOGLE. Furthermore, [2025 is the year where European GLOBAL VC funding declined to 12% \(from 18%\) due to the outsized impact of OpenAI's \\$40 billion round](#). Everybody is investing in ChatGPT and not on others. Additionally, [2025 is the year where GOOGLE and Chile signed a historic agreement to deploy a 14,800-KM submarine data cable linking South America and the Asia-Pacific region](#). GOOGLE is on the spotlight. But that's not all. And [2025 is the year where leading tech firms are about to invest \\$300 BILLION in A.I. infrastructure](#). That number can get to \$1 trillion by 2030. And countries like Germany are having a bad day: [2025 is the year where Germany faces a potential 3rd consecutive year WITHOUT growth](#). A corporate tax relief of over €45.800,000,000 is being deployed to remedy the issue. But there's some job growth in some cases: [2025 is the year where the financial services industry is experiencing robust hiring growth from roles that blend traditional finance expertise with Technology](#). And EVs are down for consumers: [2025 is the year where American consumers are pulling back from EVs](#), with only 16% of adults saying they are likely to buy an EV as their next car. And BCI (Brain-Computer Interfaces) is getting started: [2025 is the year where Neuralink plans to implant around 20-30 brain chip devices on customers](#). The Market will go mainstream around 2029. And power consumption wars: [2025 is the year where A.I. will surpass Bitcoin mining as the biggest POWER consumer](#). Next, the Global Market on Chatbots: [2025 is the year the GLOBAL A.I. chatbot Market reached \\$15 billion](#), expanding at an annual rate of around 24-30%. That's it for now. Since we are still in June, 2025, you can expect more in the near future.
