

A PUBLIC LETTER TO

JOURNALISTS

by Peterson Teixeira - CEO / Founder

JOURNALISTS,

I have a personal letter for you all to read.

by Peterson Teixeira

THE BUSINESS WORLD of today, and the world in general, owns you A LOT more than you think. A lot more. I know many of you may be feeling down, and may be feeling that your work is not important, and that it gets lost in the massive content cloud that is The Internet. And 2 hours later.....all your hard work, all your professional research and all your top-of-the-line investigative journalism turns into.....nothing. But **BOY THAT'S FALSE!** We really own you a lot. I **OWN** you a lot. The World does, actually.

I know this for a fact.

And I don't know if you know this, but I don't do compliments for no reason.

Because I actually used **1000 GOOGLE ALERTS** to monitor the global marketplace using several business/market terms. And that's a lot of monitoring, I assure you. And Google – the criminal enterprise – fed me with over 30.000 e-mails per month, and on each e-mail I had at least 3 links to go through, resulting in around 500 relevant articles to read per month. Then finally, after reading all of them, only around 50 must-read articles were necessary to reinforce.

And without these “50 articles” that “got lost in the crowd”....I wouldn't be here today. I wouldn't have built The Market Mastery section which resulted in extreme levels of sabotage by Google Analytics (adding more obvious evidence to the case against Big Tech), and I wouldn't have built The Global Financial Crisis Manifesto – A Warning by A Genius Consultant which explained....

HOW OBVIOUSLY DANGEROUS Google really is for Society today from a business standpoint and a democracy standpoint. I know many of you are fighting for Democracies, whether you're from the Left or from the Right. I, Peterson Teixeira, as you may know already, am a Right-wing. Christian. However, as you also may know, some of the content from the left, even from those more “hardcore” left-wing media sources were a must to reinforce because they were.....right. The news reporting was right.

I believe this is really why I've been facing so much persecution as well from all kinds of fronts. Because I actually read and consider both sides. Something very rare nowadays. And after carefully monitoring all the best News Media sources in the world, I caught many similar people from all those famous media sources which got featured on The Market Mastery section.

Make no mistake:

YOUR WORK IS CRITICAL NOWADAYS.

CRITICAL.

Because without **“THE NEWS”** I would still be working like crazy, doing 16-hours-per-day shifts for no reason, without being aware of all the criminal activity that The Duopoly has been doing in global markets, and how they – Google and Facebook – have been sabotaging businesses worldwide, while censoring and controlling information at the same time. Your work brought to my attention what EVERYBODY should be talking about. And I mean.....EVERYBODY. Not only businesspeople.

Hence why I made **THE CRAZY MOVE** of risking getting **Copyright lawsuits** from all kinds of news sources from all over the world. But after noticing the reality of the state of the media business (globally by the way), I didn't consider Copyright Lawsuits to be much of a bigger risk than letting a handful of big tech – criminal – companies freely decide and control everyday's citizens lives. From the personal life to the business life. But that's only because it became..... obvious. It became **OBVIOUS** how Big Tech is a monster problem. But it's all thanks to your work.

Despite the rise of **FAKE NEWS as A WEAPON**, both against citizens as against businesses, I'll never disregard the news or consider it unnecessary. Especially as a business owner. So again, please remember that your work **DOES** matter. The Internet may seem like an endless cloud of useless content sometimes, but the must-read articles – your best work – will eventually....stand out.

And some News media owners may be corrupt or have a hidden agenda or whatever, but many times the truth seeker – you – outshines the brand and stands out even when publishing on the most “irrelevant” or “corrupted” media, because the people likes the truth. And we respect that.

So regardless of where you're working from, **THE REAL BRAND** behind your news article is just.....your honest hard work. Because many times when I was monitoring the markets, the news brand to me was irrelevant, but the journalist and his/her work was not.

THEREFORE.....

PEOPLE NEED YOU more than you **THINK.**

Businesspeople need you more than you think (and more than THEY think).

It may seem otherwise because the digital landscape is now a big fat mess, and there's content flying everywhere and coming from all over the place. And many of you know about all the dirt that comes from behind-the-scenes business deals and agendas that fuels some of the news content. But you were never that necessary for the Global Society.

REPORTING

The NEWS in a world where FAKE NEWS is rampant, and used as a weapon for hidden agendas, is only for those who love giving people the truth. True journalists.

PS: By the way, is it “Journalists” or “Jornalists”? Because I've seen both a lot along the journey. Well, nevermind. I'll just call you truth seekers and real reporters.

The bottom line?

I RESPECT YOUR

WORK.

I just wanted to say that.

**Because I think sometimes you need
too hear that from people.**

Especially in these hard times.

We need the news. Keep up the good work.

God bless you All,

PETERSON TEIXEIRA
